SUMMARY

Software engineer with a product design focus and a background in computer science and psychology. Builds tools that make complex workflows easier to understand through clear information architecture, thoughtful interactions, and technical prototyping.

SKILLS & TOOLS

UX & Product Design: UX/UI Design, Interaction Design, Information Architecture, User Flows, Responsive Web Design, Human-Centered Design, Accessibility Fundamentals
Prototyping & Frontend: Figma, Technical Prototyping, React, Next.js, TypeScript, JavaScript, HTML/CSS
Technical Foundation: Java, REST APIs, Data Modeling, AWS, Git, Backend Automation

SELECTED DESIGN PROJECTS

MacWipe Case Study

- Designed a review-first storage cleanup flow with file details, persistent Keep exclusions, and explicit confirmation. Separated read-only exploration from eligible cleanup actions to make their scope and consequences visible.

GoogleCleaner Case Study

- Designed file discovery, filtering, and selection for a Google Drive extension. Preserved hidden selections in Review and exposed background progress, individual failures, and retry controls so users can follow bulk actions.

FigmaCleaner Case Study

- Built a theme-aware Figma plugin with separate hidden-layer, empty-container, and single-child-group actions. Communicated active-page scope and completion status; created a browser sandbox to demonstrate layer-tree operations.

Developer Portfolio Case Study

- Organized project evidence in a shared case-study template and built responsive layouts, keyboard-accessible navigation, and reduced-motion support using Next.js, React, and CSS.

PROFESSIONAL EXPERIENCE

Amazon Prime Video Seattle, WA
Software Engineer *May 2024 – September 2025*

- Built Java services and AWS infrastructure for the Unified Metadata Platform, supporting millions of content records and production publishing workflows. Collaborated with product managers, engineers, and internal content operators to deliver features and simplify metadata management.

Amazon Prime Video Seattle, WA
Software Engineer Intern *May 2023 – August 2023*

- Designed, implemented, and deployed a metadata ingestion service that validated and transformed partner submissions, eliminating approximately six hours of manual preprocessing for malformed submissions.

Amazon Care Seattle, WA
Software Development Engineer Intern *May 2022 – August 2022*

- Developed services for appointment scheduling, prescription delivery, and patient notifications; designed proximity-based routing to replace FIFO assignment.

Green Bank Observatory Green Bank, WV
Web Developer Intern *January 2020 – May 2021*

- Built REST APIs and data-processing workflows for the Skynet Robotic Telescope Network, improving the storage, retrieval, and accessibility of observational data for researchers and educators.

EDUCATION

Florida State University May 2024
B.S. Computer Science

Santa Fe College August 2020
A.A. Psychology, Honors
