PROFESSIONAL SUMMARY

Software engineer with a B.S. in Computer Science and experience at Amazon Prime Video, complemented by a background in mentoring, tutoring, student leadership, and customer-facing roles. Experienced working with technical teams, communicating complex ideas, supporting early-career professionals, and taking ownership of projects and programs. Interested in bringing firsthand engineering experience and a people-centered approach to technical recruiting and university talent programs.

CORE STRENGTHS

People & Leadership: Mentoring, Tutoring, Training, Student Leadership, Relationship Building, Cross-Functional Collaboration, Customer Communication

Technical Fluency: Software Engineering, Backend Systems, Cloud Infrastructure, Java, Python, JavaScript, TypeScript, AWS, REST APIs

Program & Communication: Project Ownership, Technical Documentation, Presentations, Event Coordination, Organization, Written Communication

Languages: English, Spanish (Native)

PROFESSIONAL EXPERIENCE

Amazon

Seattle, WA

Software Engineer – Prime Video

May 2024 – September 2025

- Collaborated with engineers across the development lifecycle, including technical design, architecture discussions, code reviews, implementation, deployment, and production operations.
- Mentored a newly hired software engineer, providing technical context, development support, and guidance while they became familiar with the team's systems and engineering practices.
- Authored technical design documents and communicated implementation decisions for distributed backend systems supporting Prime Video's metadata platform.
- Built production Java and AWS systems supporting millions of content records, providing firsthand experience with the skills, responsibilities, and working environments of software engineering teams.
- Worked independently across ambiguous technical problems while coordinating with teammates and stakeholders to move projects from design through production.

Amazon

Seattle, WA

Software Engineer Intern – Prime Video

May 2023 – August 2023

- Independently owned a software project from technical design through implementation, testing, deployment, and production rollout while working closely with experienced engineers and incorporating feedback through reviews.
- Built a metadata ingestion service that eliminated approximately six hours of manual preprocessing per malformed submission through automation.
- Developed experience navigating the university-to-industry transition through Amazon's technical internship program and subsequent return to full-time software engineering.

Amazon

Seattle, WA

Software Development Engineer Intern – Amazon Care

May 2022 – August 2022

- Worked on a cross-functional healthcare technology team developing backend services supporting scheduling, prescription delivery, and patient communications.
- Analyzed behavioral data from more than 25,000 monthly active users and used findings to contribute to product and customer-experience improvements.

EDUCATION & MENTORING EXPERIENCE

University of Central Florida

Orlando, FL

Physics Learning Assistant / Tutor

- Tutored students individually and in small groups, adapting explanations to different learning styles and helping students strengthen their understanding of course material.
- Observed student progress, provided individualized support, and communicated concepts clearly to students with varying levels of experience.

Student Leadership & Community Involvement

- Held multiple student leadership positions, including section leader and Tri-M Music Honor Society Secretary, helping organize activities, coordinate students, and support community-service initiatives.

- Helped establish a new women’s lacrosse organization when the local school did not offer the sport, working with other students to build participation and advocate for the program.
- Participated in Student-to-Student (S2S), a student organization focused on creating a welcoming environment and helping students integrate into a new school community.

EDUCATION

Florida State University	May 2024
B.S. Computer Science	
Santa Fe College	August 2020
A.A. Psychology, Honors
